

BSK80 PEELPRO COCKTAIL HARD

Chemical abrasion mask | 50 ml

It reduces the thickness of the stratum corneum, reducing corneocyte cohesion. Diminishes fine lines and wrinkles. It improves the elasticity of the skin and the collagen support structure. It removes dead cells from the upper part of the skin and reduces superficial changes in pigment: aging and sun spots. Smooth and soft skin. Unclog pores cleanse acne. Reduces pore size and normalizes oil production. Increases the skin's ability to retain moisture. Promotes rapid cell turn over.

BSK88 PEELPRO BRIGHTENING

Chemical abrasion mask | 50 ml

It is a neutralizing solution with Aloe Vera that increases the pH of the skin to counteract the aggressive effects of acids after the application of a peel. It is recommended to apply it to the skin to neutralize residual acids after removing the product as indicated on the PEELPRO product use sheet.

Reduces pore size and normalizes oil production. Increases the skin's ability to retain moisture. Promotes rapid cell turnover.

BSK83 PEELPRO WHITE

Chemical abrasion mask | 50 ml

BSK83 is a chemical abrasion mask formulated mainly with alpha and beta hydroxy acids and depigmenting active ingredients. It has combined the exfoliating action of salicylic acid, citric acid and lactic acid, with the depigmenting power of the combination of kojic acid and Arbutin, complemented with the antioxidant effect of ascorbic acid (Vitamin C). It has been formulated at a pH of 2.5 to favor the exfoliating effect of alpha and beta hydroxy acids and the inhibiting activity of tyrosinase.

BSK87 PEELPRO BRIGHTENING
